

Schlage Control® Smart Lock

Mobile-Enabled Wireless Deadbolt and Interconnected Lock

The Schlage Control® mobile-enabled smart lock was designed specifically for multifamily residence doors. It allows properties to offer convenient security to residents and intelligent efficiency to property managers. And, through support for Bluetooth® mobile credentials, Schlage is opening the door to any number of future possibilities.

Operation Platform

Features

- Available as a deadbolt or interconnected (singlemotion egress) lock.
- Open architecture design gives properties the freedom to choose the physical access control software (PACS) or Proptech system that best fits their needs.

Benefits

- Interconnected lock provides single motion egress to comply with regional requirements.
- No-Tour feature allows property managers to assign and change access rights without visiting the lock.
- Capability to view history of access, usage data, receive alerts and more.

Guest Platform

Features

- Supports networked real-time (ENGAGE™ Gateway required), No-Tour and offline applications.
- Low battery notifications enable proactive replacement and fewer lockouts.

Benefits

- Eliminates cost and hassle of managing keys.
- Offers residents the convenience of using a smartphone and/or smart credential to gain access.
